### Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Leandro Arechederra on 8/22/2006.

#### In the claims:

1. (currently amended) A process for polymerizing olefin(s) to produce a polymer product, the process comprising contacting ethylene and at least one comonomer with a catalyst system, wherein the catalyst system comprises a poor comonomer incorporating catalyst compound comprising a metallocene structure comprising at least one fused ring cyclopentadienyl ligand bridged to another cyclopentadienyl ligand, where the bridge is a long bridge defined as a bridge containing ~~2 or more atoms~~ an Si-O-Si group, and a good comonomer incorporating metallocene catalyst compound; wherein the poor incorporator is a polymerization catalyst which when run under process conditions wherein  $(\text{Ind})_2\text{ZrCl}_2$  would produce a  $0.920 \text{ g/cm}^3$  density polyethylene, produces a polymer with a density greater than  $0.920 \text{ g/cm}^3$ ; further comprising isolating a polymer product having a density of from  $0.910$  to  $0.940 \text{ g/cm}^3$ , an  $M_w/M_n$  value of from 2 to less than 10 and an  $I_2$  value of from 0.1 to  $100 \text{ dg/min}$ .

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

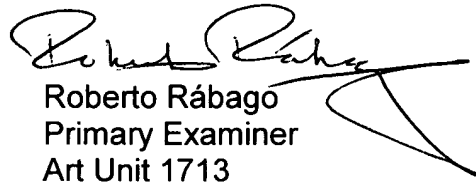

Newly cited is Chien (US 6,177,377) which discloses in Example 55 a method of making an in-situ blend of polyethylene and ethylene copolymer comprising a poor comonomer incorporating metallocene compound having a four-atom bridge and a second metallocene. However, the reference does not disclose analogous methods comprising a fused-ring metallocene comprising a bridge with an Si-O-Si group as currently amended; no motivation can be found to modify the reference example to use the type of metallocene specified in the claims.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
